Study

Information Technology

Is IT the right choice, will you continue, results so far - student's perspective:

Choosing IT course was a significant decision in my life and the reason why I choose it was because of my interests, skills and long-term goals. In my opinion, I made a correct decision because I enjoy working on a computer, solving problems and staying updated with tech trends. In addition, the career of IT professional includes good career prospects. This means, a high demand for IT professionals on a job center. What is more, I am willing to grow and learn all the time to develop my skills and improve my adaptability. Although at the beginning everything was new to me and I felt a bit overwhelmed by a big amount of new information, now I feel more confident of what I am doing and how. I had to start learning programming languages, writing documentation and managing workloads. However, with dedication and discipline I managed to structure my studying. What is more, I have a brilliant opportunity to work in groups with other students and we can share our knowledge and learn together. As a result, such collaborative environments can enhance learning experiences. Moreover, all information which I am learning I am practicing which gives a better understanding. To sum up, I believe I am on a right track and if I continue doing my best and putting enough efforts, I will succeed and get satisfaction from what I am doing.

Is IT the right choice, will he/she continue, results so far - team's perspective:

This is the lecturer's part, therefore do not fill this part in

Additional remarks:

Signature student:

A rectangular box containing a handwritten signature in black ink. The signature is cursive and appears to read 'V. de Heer'.
